Coeficient of Friction vs. % Ekonol® in PTFE

The graph shows the coefficient of friction data corresponding to the wear test. This graph illustrates that there is relatively little difference in the coefficient of friction between PTFE and the combination of Ekonol® and PTFE. Pure Ekonol® Polyester has a coefficient of friction of 0.37 under these conditions.

Coeficient of Friction vs % Ekonol® in PTFE
2 hrs. Test at 110 psi (0.76 MPa), 90 fpm (27.4m/min) on a LFW-1 tester.
